

TABLETOP EXERCISE

SERVICE OVERVIEW

Legato Security's **Tabletop Exercise** is a tailored simulation in which Legato Security experts simulate an attack against a customer, testing the capabilities of their existing security posture. As part of the simulation, Legato Security will work with the customer to execute, document and report their responses, then provide feedback to improve customers' tactics, responses and, policies. These exercises are designed to gauge customers' response capabilities and provide strategic recommendations for improved practices. **Tabletop Exercise** customers can expect to finish the program with better policies, better-trained employees, and an enhanced overall security posture.

SERVICE CAPABILITIES

BUSINESS OUTCOMES

STREAMLINE EVENT RESPONSE

A **Tabletop Exercise** will help customer teams develop and improve their security-event response behaviors.
